## DETAILED ACTION

### *Prelim./Amdt.*

1. Receipt is acknowledged of the amendment filed 12/12/2005.

### *Allowable Subject Matter*

2. Claims 1-11, 13-24, 26-30 and 32-35 are allowed.
3. The following is an examiner's statement of reasons for allowance: With regard to independent claims 1, 4-6, 13, 15, 18-21, 24, 27, 30 and 32-35, although the prior art of record, Blum et al. (US 6,982,649 B2), discloses a message system having a wall, a message generator and a proximity sensor, Blum fails to disclose the wall as set forth in the independent claims above. Applicant defines the wall as "a wall having opposite first and second sides comprising a mirrored surface which is capable of producing a discernible, reflective image of an object placed at the first side of the wall or a blocking surface which substantially obstructs viewing of an object at the second side of the wall through the wall from the first side of the wall" in all the independent claims. Applicant further defines the message generator as "the message generator capable of making a message viewable from the first side of the wall through at least a part of the wall" or "the message generator in the first state causing a first message to be viewable at the wall from the first side of the wall" in the claims. No other prior art teaches the limitations above in combination. Claims 2-3, 7-11, 14, 16-17, 22-23, 26, and 28-29 depend from claims 1, 13 and 20-21. Therefore, claims 1, 4-6, 13, 15, 18-21, 24, 27, 30, and 32-35 are patentable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

*Conclusion*

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blum et al. (US 6,982,649 B2) discloses a message system having a display wall, a message generator and a proximate sensor.
